DRINK MARKERS

## What are drink markers and what are they for?

Personalized drink markers are a great addition to any social gathering, thanks to which participants will be able to recognize their own glass from the others. It is an **extremely versatile gadget** - it will work both during a company event and at a house party with friends.

Glass markers are one of those products that are distinguished by a **high degree of personalization**.

## How to use our markers?

Glass markers should be used in accordance with their intended use. The way to put them on is extremely simple - just slide the marker on the rim of the glass from which you drink.

In addition, due to the product's resistance to high water temperatures, the tags can be washed under a warm stream of water.

The product can be left in a place exposed indirectly (i.e. window, car windshield) to sunlight.

The product should not be washed in a dishwasher or subjected to any thermal treatment (oven, microwave oven, and others).

Do not expose the product to detergents and other chemical cleaning agents.

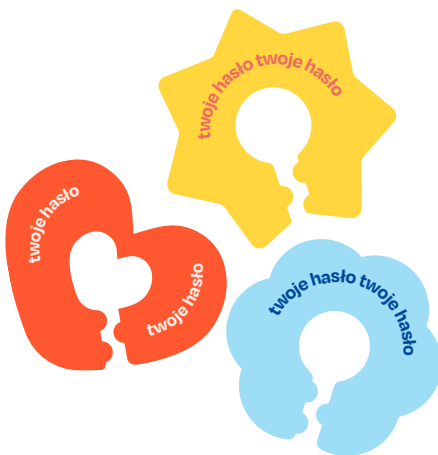

The product is not a toy.

# There are **two ways** to create drink markers

## 1. Create glass markers from scratch

Send us **your original idea** for tags and we will create it! Decide on their shape, resin color, texture, matte or glossy finish, and marking. The entire creation process can be found on page 5.

## 2. Select the developed pattern

Choose a ready-made pattern of markers for glasses from the available shapes at our disposal. Customize your color, texture, matte or gloss finish, and branding. The developed patterns can be found on page 6.

**The deadline for order completion**, depending on the selected product volume and production occupancy, is approx 7 working days from the date of acceptance of the visualization project by the customer, and then the acceptance of the photo of the first production sample and prepayment - if any.

# Share the idea for your drink markers

Your idea is the starting point for the development of the project. You can describe your vision to us or create a sketch, and we will translate it into a graphic design and visualization of your drink markers. You can also provide us with a finished project yourself.

**In what form can you send us your idea?** As a vector file or a word description of the project you want to implement, send it to [biuro@dothat.pl](mailto:biuro@dothat.pl).

## What does the process of creating from scratch look like?

3D printing enables the implementation of projects with extremely precise and complex shapes, thanks to which our production process is limited only by your imagination!

### Send your idea

It can be a sketch, graphic, photo or description.

### Wait for the visualization

We are finalizing the details and creating a visualization of your product and checking it for production. **After accepting the visualization and order**, you receive a **photo of the manufactured product**.

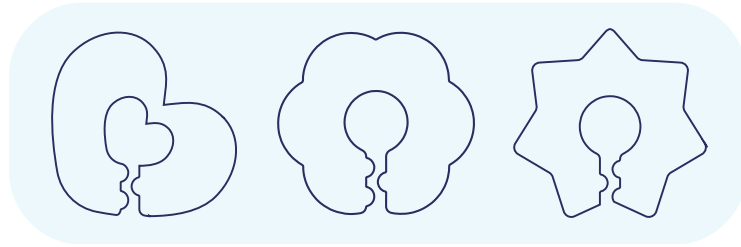

### Final version

If the **produced prototype is accepted**, we start the main production, and then we send the product to you!

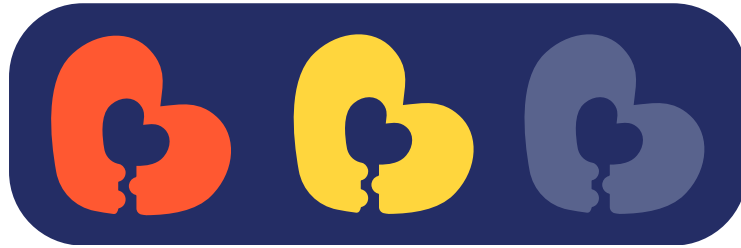

# What are the personalization options?

## Find out what you can change

### I. Shape

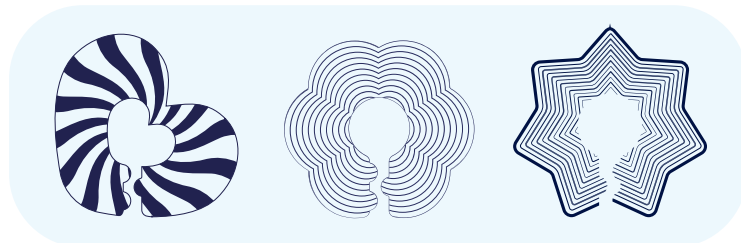

### II. Standard or transparent resin color

### III. Marking

### IV. Texture

### V. Matte or glossy finish

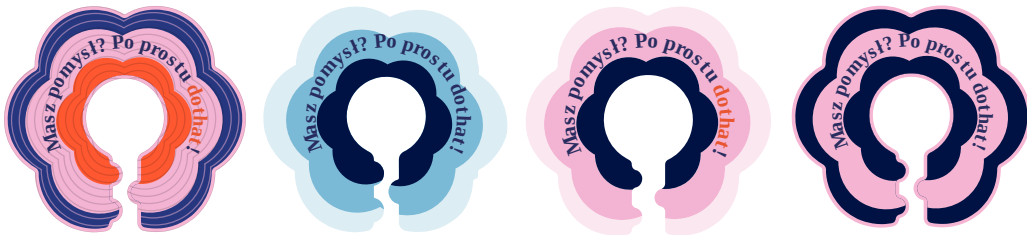

# Ready models

One of the ways to place an order when creating drink markers is to choose from ready product designs that we have already implemented.

Below are the shapes we developed that **you can adjust to your needs**. By choosing one of them, you can change the color, texture, finish (can be matte or glossy) and choose any text and marking - it's all up to you.

## Flower

## Star

## Heart

# Product packing

We also personalize our products at the packaging stage. Each set of glass markers is placed in a transparent bag with a dedicated cardboard box. You can compose a set of markers in pairs and create sets of 2, 4, 6, 8 markers.

The front and back of the box are designed by us for each order - we make every effort to make it a coherent whole together with the tags.

We can also offer you other types of packaging with specially designed graphics. The packaging method depends on the type of marker and the number of markers in a single set.

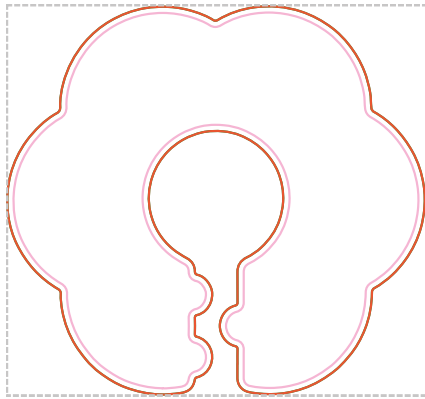

obverse

reverse

# Drink markers specifications

The dimensions of a single marker depend on its shape and can be up to 33 mm wide and 31 mm high.

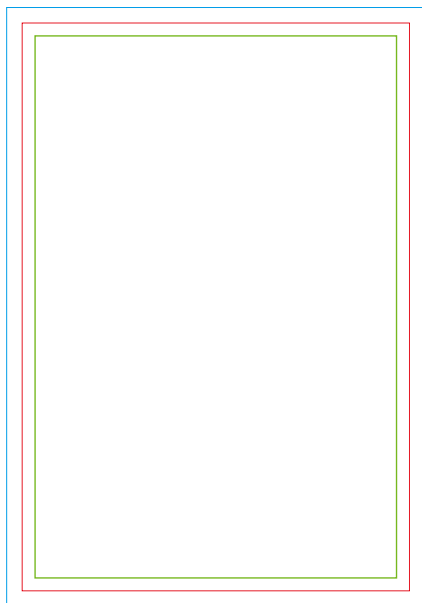

-  32 mm x 30 mm  
Safe area of textured design
-  33 mm x 31 mm  
Product outline
-  33 mm x 31 mm x 3 mm  
Maximum product size (for individual shape)

**SCALE 1:1**

## Preparation of cardboard files

The file should be prepared in **PDF format** in the CMYK color space. Please prepare the file in gross size without printing marks. All texts should be **converted to curves**.

The optimal resolution for raster graphics and photos is **300 DPI**.

-  70 mm x 105 mm  
Safe area
-  75 mm x 110 mm  
Net area
-  81 mm x 116 mm  
Gross area

**obverse/reverse**
